

Safety Talk Tuesday

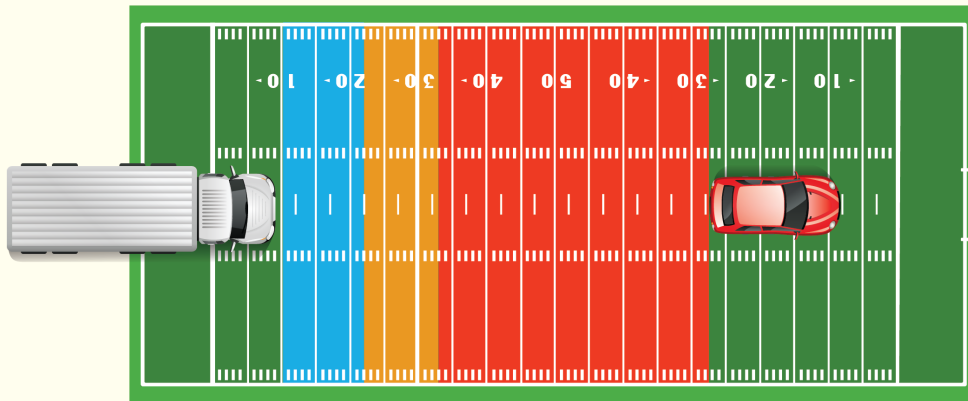

Destination: Safe Stopping Distances Stopping Distance Facts and Tips for Safer Driving

Rear-end accidents are the most common type of accident in the United States¹

Traveling 30 Mph it takes on average **33 Feet to Perceive a hazard**, **33 feet to React to it**, and **at least 153 feet to Brake**.²

That's Almost the Entire Length of a Football Field!

Are You Following To Close?

Poor weather conditions or increases in speed cause total Stopping distance to increase drastically!
