

Cold Weather and Freeze Alert

Keep your heating systems operating

Keep your building and equipment warm. Heating systems are the lifeline of your business during cold conditions. If they fail, disaster could strike.

Immediate action required:

- All piping must be insulated. Install new and replace damaged insulation where necessary, and don't forget to examine your sprinkler system.
- Inspect all outside dampers for proper operation.
- Clear and protect all outside vents from ice and snow accumulation.
- Heat requires power. If generators are unavailable, make arrangements to obtain non-electrical portable heating during outages.
- If you have tracing, make sure that it is energized, and also be prepared to supply back-up power to heat tracing systems.

Safeguard business equipment during power outages

Voltage surge protection is necessary at all times – especially during cold, freezing conditions. Severe weather can cause power loss and downed wires, disrupting your business' power supply. When electricity is restored, the sudden surge of power can literally destroy the modem, high-tech equipment your business relies on.

Immediate action required:

- Unplug it. Anticipate voltage surges during severe weather. The best solution is equipment isolation – turn it off and unplug it. If you need to keep equipment running, installing surge protectors can provide protection.
- Prepare for power outages. If you rely on generators for back-up power, perform preoperational checks and start-up tests. Consult your generator's manufacturer for details. In preparation for an extended outage, develop a contingency plan for refueling generator engines.
- Turn it back on. When power is restored, plug in and turn on devices one at a time.

Cold Weather and Freeze Alert

Protect your building and ensure accountability

The time is now – your business is facing extreme temperatures within 24 hours. Protect your building and prepare your people before cold weather and freezing temperatures arrive.

Immediate action required:

- Inspect building. Close all windows, doors and outside dampers. Schedule regular building checks during storms and cold weather. Arrange for snow and ice removal, including the roof.
- Who's responsible? Ensure accountability by designating personal responsibility for loss prevention. Business and building owners must work together with facilities and maintenance people.
- Provide emergency telephone numbers. Collect and distribute a list of emergency phone numbers and contacts, such as snow removal, heating system repair company, utility company, and the weather bureau.
- Anticipate flooding. Severe and cold weather can cause flooding. Move susceptible equipment or stock to an alternate location, where water cannot reach it.
- Always have cold-weather gear on hand. – Have plenty of gloves, hats, emergency blankets, flashlights available. Provide them to your people, and make sure they know where cold weather gear is stored.

The services described herein are intended for the express purpose of assisting AIG underwriting personnel in the underwriting of the subject insured's risk exposures, property and/or operations and to assist in loss control activities. No warranty, guarantee, or representation, either expressed or implied, is made as to the correctness or sufficiency of any such service. Services may not address each and every possible loss potential, violation of any laws, rules or regulations, or exception to good practices and procedures. AIG assumes no responsibility for the discovery and elimination of hazards which could possibly cause accidents or damage at any facility that is inspected. Reliance upon, or compliance with, any of the information, suggestions or recommendations contained in any of the services described herein in no way guarantees the fulfillment of any insured's obligations under its insurance policy or as may otherwise be required by any laws, rules or regulations.

American International Group, Inc. (AIG) is a leading international insurance organization serving customers in more than 100 countries and jurisdictions. AIG companies serve commercial, institutional, and individual customers through one of the most extensive worldwide property-casualty networks of any insurer. In addition, AIG companies are leading providers of life insurance and retirement services in the United States. AIG common stock is listed on the New York Stock Exchange and the Tokyo Stock Exchange.

Additional information about AIG can be found at www.aig.com | YouTube: www.youtube.com/aig | Twitter: @AIGinsurance | LinkedIn: www.linkedin.com/company/aig

AIG is the marketing name for the worldwide property-casualty, life and retirement, and general insurance operations of American International Group, Inc. For additional information, please visit our website at www.aig.com. All products and services are written or provided by subsidiaries or affiliates of American International Group, Inc. Products or services may not be available in all countries, and coverage is subject to actual policy language. Non-insurance products and services may be provided by independent third parties. Certain property-casualty coverages may be provided by a surplus lines insurer. Surplus lines insurers do not generally participate in state guaranty funds, and insureds are therefore not protected by such funds.
